If you're tackling the
daily grind...

food waste disposers

...grind daily
the simple hygienic answer to messy food waste

because you've got enough on your plate because you've got enough on your plate because you've got enough on your plate because you've got enough on your plate

preparing even the most beautiful food creates bags of mess

cooking can be such a joy but the messy and unhygienic food waste it creates is something we'd all rather do without, an InSinkErator® food waste disposer is the simple answer...

labour-saving with today's busier lifestyles we are all keen on devices that can help us enjoy our leisure time to the full. Choosing an InSinkErator food waste disposer is an ideal way to let you spend more time doing the things you want to do around the home and less time worrying about what to do with your messy unwanted waste.

quality as the world's no. 1 brand, InSinkErator food waste disposers are manufactured to the highest standards and come with a 2, 3, 4, or 5 year parts and labour warranty.

whatever your lifestyle, a food waste disposer offers you so many benefits that you'll soon wonder how you ever managed without one

why should I have a food waste disposer?

clean rather than scraping and pouring messy food waste into a kitchen pedal bin, simply turn on the cold water tap, switch on and empty the unwanted food waste into the sink. The InSinkErator food waste disposer grinds the food waste to fine particles and simply flushes it away in seconds. This all adds up to reduced mess, fewer spills and less cleaning up.

hygienic using a food waste disposer to get rid of unwanted and leftover food waste, almost as soon as it is created, is a lot more hygienic than allowing food left in the bin to go off encouraging smells, bacteria and insects.

convenient approximately 20% of household waste is food, so flushing it away from the kitchen sink means fewer trips to the pedal bin and fewer trips outside to the dustbin saving you time and hassle.

practical an InSinkErator food waste disposer is compact and unobtrusively fitted under the sink without taking up valuable storage space. It is easy to install either in a new or existing kitchen and can be fitted to most sinks.

responsible whilst improving your own quality of life in the kitchen, it's also good to know that you're making a positive contribution to your environment. Food waste disposers not only reduce the amount of household waste that ends up in landfill sites, but the waste can also be recycled into a soil conditioner at the water treatment plant.

a simple addition to your kitchen

if you're thinking about a new kitchen or kitchen makeover, it's the ideal opportunity to ask your kitchen designer or supplier about an InSinkErator food waste disposer. In addition, the 'quick-lock' mounting assembly ensures fast and easy DIY or professional installation, with the option of a work-surface mounted air switch for ease and convenience.

whatever your lifestyle, a food waste disposer offers you so many benefits that you'll soon wonder how you ever managed without one

every kitchen should have one, but which one?

InSinkErator has a range of five different food waste disposers to choose from, whatever your lifestyle there is a model to suit your needs, families small or large. Model 75 is the quietest and most powerful disposer in the range.

model features	75	65	55	45	78
parts and labour warranty	5 years	4 years	3 years	2 years	3 years
horsepower	0.75	0.65	0.55	0.5	0.75
high-torque Dura-drive* induction motor	●	●	●	●	●
continuous feed	●	●	●	●	
stainless steel superior grinding system	●	●	●		●
auto reverse	●	●			●
built-in air switch	●	●

'quiet-plus' sound insulation		●			
batch feed					●

an air switch accessory, available for use with models 45 and 55, can be installed on the worktop or sink and is supplied with interchangeable chrome and white finishes (cut out size 33mm diameter).

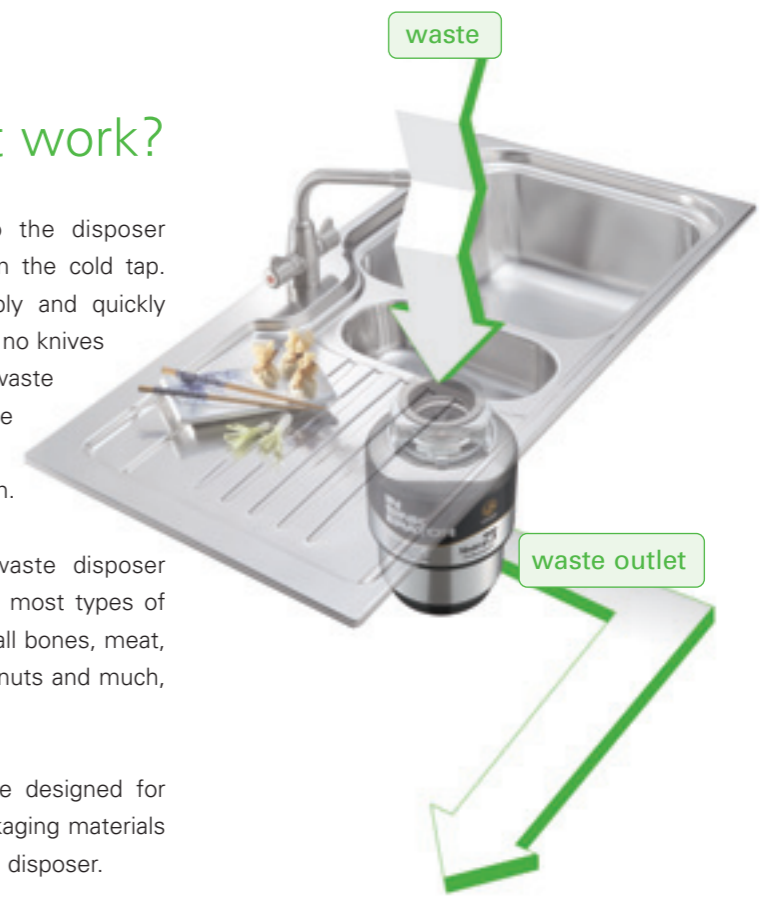

*specifically designed for InSinkErator products.
a range of accessories are available including an extended flange for a sink thickness greater than 20mm and a 60mm waste reducer for smaller diameter waste outlets.

how does it work?

food waste is fed into the disposer together with water from the cold tap. The food waste is simply and quickly ground into fine particles, no knives and no blades. The food waste is then flushed through the waste disposer and into your normal waste system.

the InSinkErator food waste disposer is designed to cope with most types of food waste, including small bones, meat, fish, peelings, eggshells, nuts and much, much more.

food waste disposers are designed for food waste only and packaging materials should not be put into the disposer.

is it easy to use?

if you would like to find out how easy it is to install and use an InSinkErator food waste disposer please call us on 0800 389 3715 for details of our user installation DVD.
